

BNF

British National Formulary

Product Description

The BNF is published jointly by the British Medical Association and the Royal Pharmaceutical Society of Great Britain.

This essential reference provides up-to-date, practical guidance on prescribing, dispensing, and administering medicines.

The BNF evaluates clinical evidence from diverse sources with information validated by a network of clinical experts and is published under the authority of a Joint Formulary Committee. The BNF reflects current best practice as well as legal and professional guidelines relating to the uses of medicines. The resource includes:

- Guidance on the drug management of common conditions
- Details of medicines with special reference to their uses, cautions, contra-indications, side-effects, doses, and relative costs
- Guidance on prescribing, monitoring, dispensing, and administering medicines

Purpose

- To provide rapid reference to essential information on the selection of safe and effective medicines for individual patients
- To provide authoritative, impartial, and where available, evidence-based advice on prescribing, dispensing, and administering medicines
- To reflect promptly changes in product availability as well as emerging safety concerns and shifts in clinical practice

Updates

The content is revalidated, revised, and updated on a biannual basis.

Focus

Medicines prescribed in the UK are covered and those considered less suitable for prescribing are clearly identified. Little or no information is included on medicines promoted for purchase by the public.

Audience

- Doctors and other prescribers
- Pharmacists
- Dentists
- Nurses
- Other healthcare professionals
- Students training to join the health professions

Uses

- Designed for rapid reference
- To find information on the choice of medicines for a given condition
- To find information about the clinical properties of a specific medicine
- To find practical guidance on how to prescribe, dispense, administer or monitor a medicine
- To advise patients about their medicines
- As an educational tool for students training to join the health professions and for continuing professional development
