

What's new in AHFS Drug Information January update 2010

AHFS Drug Information is continually undergoing re-validation and revision. Each month, new and revised sections are published on MedicinesComplete. This is a list of the changes made since the last update.

This update contains 20 revised monographs. Eltrombopag and Tetrabenazine were expanded from FirstReleases to Overview monographs (expanded cautionary information). The remaining monographs were revised to incorporate information from prior MedWatches and/or labeling changes.

Revised monographs

Levetiracetam
Dexmethylphenidate
