

What's new in AHFS Drug Information November update 2009

AHFS Drug Information is continually undergoing re-validation and revision. Each month, new and revised sections are published on MedicinesComplete. This is a list of the changes made since the last update.

This update contains 23 revised monographs. Of these, 4 are MedWatch alerts from October (Rituximab, Iron Dextran, Heparin, Exenatide); the remaining revisions are due to updated therapeutic guidelines or labelling.

Revised monographs

Pantoprazole
Emtricitabine
Entecavir
Raltegravir
