

What's new in Stability-indicating HPLC Methods for Drug Analysis June update 2011

This update includes 33 new monographs. There are 77 totally new stability-indicating HPLC methods, including those added to the existing monographs.

New monographs

Alizapride Hydrochloride
Alphamethylepoxide
Anastrozole
Bisoprolol Fumarate
Cholesterol
Citicoline Sodium
Clidinium Bromide
Curcumin
Desloratadine
Eletriptan Hydrobromide
Entecavir
Erlotinib Hydrochloride
Etodolac
Exemestane
Famciclovir
Fluvastatin Sodium
KSP-siRNA
Mephenesin
Meprednisone
Meprobamate
Metformin Hydrochloride
Olanzapine
Perindopril
Pravastatin Sodium
Ricobendazole
Rifaximin
Rosuvastatin Calcium
Salicylic Acid
Sulfadimethoxine
Trazodone Hydrochloride
Valsartan
VEGF-siRNA
Voriconazole
